3-ELEMENT STEEL DOOR FRAME
IDEAL FOR YOU

The advantages of the FAST door frame

THE PRODUCT:
- FAST – our new, 3-element steel door frame, intended for the European and global market
- FAST – the product was awarded with the 2017 Golden Medal of the Poznan International Fair for its innovative nature, basing on highest-class technology, confirming the perfection of the product.
- FAST – perfect, finished product, made of zinc-plated steel coated with powder paint, intended for installation in plasterboard walls of 100 mm, 125 mm and 150 mm
- FAST – has high resistance to damages, high humidity and, in the event of a room reconstruction, offers quick disassembly and assembly without additional costs
- FAST – available in 4 standard colors and, on request, in the full RAL color palette.

ASSEMBLY:
- FAST – the door frame is installed in plasterboard walls, which generates significant time savings, and, as we know, time is money.
- FAST – easy to assemble – 9 min. in finished walls and finished flooring – parquet, stone, tiles, carpet, etc.
- FAST – clean assembly, without the use of fitting foam and without drilling – hence, without dust in the room.

TRANSPORT:
- FAST – easy transport – 2 cardboard boxes. There are two vertical beams and accessories in one box, and a top horizontal beam of a certain size in the other one.
- FAST – will fit every car boot, thanks to a simple packing system

INTENDED PURPOSE:
- FAST – an ideal door frame for apartments, offices, industrial plants, medical facilities, technical halls, restaurants, sanitary rooms and more, 5 YEARS OF WARRANTY.
- FAST – fits all typical commercially available wooden and steel rebated door panels that are made (depending on the option) in accordance with PN or an investment standard, of a weight of max. 40kg (1 pair of assembly anchors), and for an order 80kg (2 pairs of assembly anchors).
- FAST – fits to all interior, rebated door leaf, manufactured in Polish Norm PN 60-100, and Polish Investment Norm (PNI) in size 80-90.
ORDER OF ASSEMBLY
OF A 3-ELEMENT DOOR FRAME

1. VERTICAL BEAM, HINGE SIDE

2. UPPER BEAM

3. VERTICAL BEAM, LOCK SIDE

Door frame structure

- **The door frame** is made of highest-class, zinc-plated 1.2 mm sheet metal.
  The structure of the door frame allows its 'dry' assembly in plasterboard walls of 100, 125, 150 mm. The door frame is manufactured and delivered in parts, packed in two cardboard boxes, intended for self-assembly at the construction site (horizontals and verticals separately).
  The door frame consists of:
  - A set of **verticals** – a hinge stand, a lock stand
  - A **horizontal element** – the lintel
  - **Accessories**: installation anchors for plasterboards, hinges – the door frame part, door frame guides – peripheral seal.

Accessories in the price of the door frame

- Two or three standard pintle hinges (the door frame part)
- Three hinges (in a '100' door frame)
- A thermoplastic elastomer peripheral seal
- Special installation anchors (2 pcs.) for plasterboard walls

Additional accessories / Surcharges

- Additional, special installation anchors (2 pcs.)
- Door closer reinforcement
- Stainless steel threshold
